

LPI 300 - LDAP, Samba, Integration with MS Windows and Mixed Environments (code: LPI-300)

Overview

This training course is a comprehensive, lab-oriented class on OpenLDAP configuration, including integrating authorization systems and services. During the training course, participants become familiar with SAMBA server (SMB Protocol): basic and advanced configuration, user management, domain integration, working with MS Windows clients.

The training course is directed mainly at advanced Linux systems administrators, wanting to deepen their understanding of services/systems authorization and secure configuration of network shares.

We are an approved **Linux Professional Institute** training partner. Our training covers the topics needed for the **LPIC-3 300** exam. After passing that exam, you will acquire LPIC-3 Linux Enterprise Professional certificate.
