

Introduction to Project Management (code: PM-PZP)

Overview

Project management is a structured approach to planning and implementation of the project from its initiation to completion. There is no magic formula for ensuring the completion of each project with success, but there are proven, effective techniques that increase the chances of such a venture.

The training is to provide basic knowledge and acquaint participants with the tools and techniques of project management. The training is prepared and conducted by an experienced project manager, a certified PMP (Project Management Institute).

After the course students should:

- know what is a project, what is its life cycle and role in the organization,
- be familiar with basic concepts of project management,
- be able to use basic tools and techniques of project management.
