XML Schema Modeling (code: XML-sch)

Overview

XML Schema is the industry standard allowing for a precise definition of the structure of a XML document. It's hard to imagine using more complex XML documents without defining their XML Schema. Participants in this training learn the capabilities of XML Schema and how to use its patterns. They also learn how to create their own patterns.

Duration

2 days

Agenda

1. Day 1
   — Introduction to XML Schema.
   — Modeling the structure of XML Schema documents.
   — Namespaces.
2. Day 2
   — Types in XML Schema.
   — Integrity restrictions.
   — Substitution groups.
   — Overview of other mechanisms for XML Schema.
   — Overview of alternative techniques for creating patterns.

Target audience and prerequisites

General familiarity with issues related to XML. Some familiarity with the related standards and common applications of XML. We recommend taking earlier the course "Introduction to XML".

Certificates

Course participants receive completion certificates signed by ALX.

Locations

— Warsaw (English) – Jasna 14/16A
— Online (English) – your home, office or wherever you want
— any other location (London, UK, EU) on request

Price

740 EUR
